(alphabetical by first name)

Bob Ristow made this Mary figure. It is offset turned, not sure of the wood. He made several of each, going to friends and family.

Bob Ristow made this Santa ornament of basswood, with acrylic finish. He made several for friends and family.

Don Rosendale made these simple candle holders for the season.

Maple with Hut finish.

Gary Nosek turned  
this bowl from box  
elder for his  
Brother-in-Law.

John Cox made this earring holder for hoop style earrings for his Niece.

On the earring hanger, the top section will come off and there is a counter bore so that the center fits into it. There is a pin in both pieces so that the top section will turn and not come off.

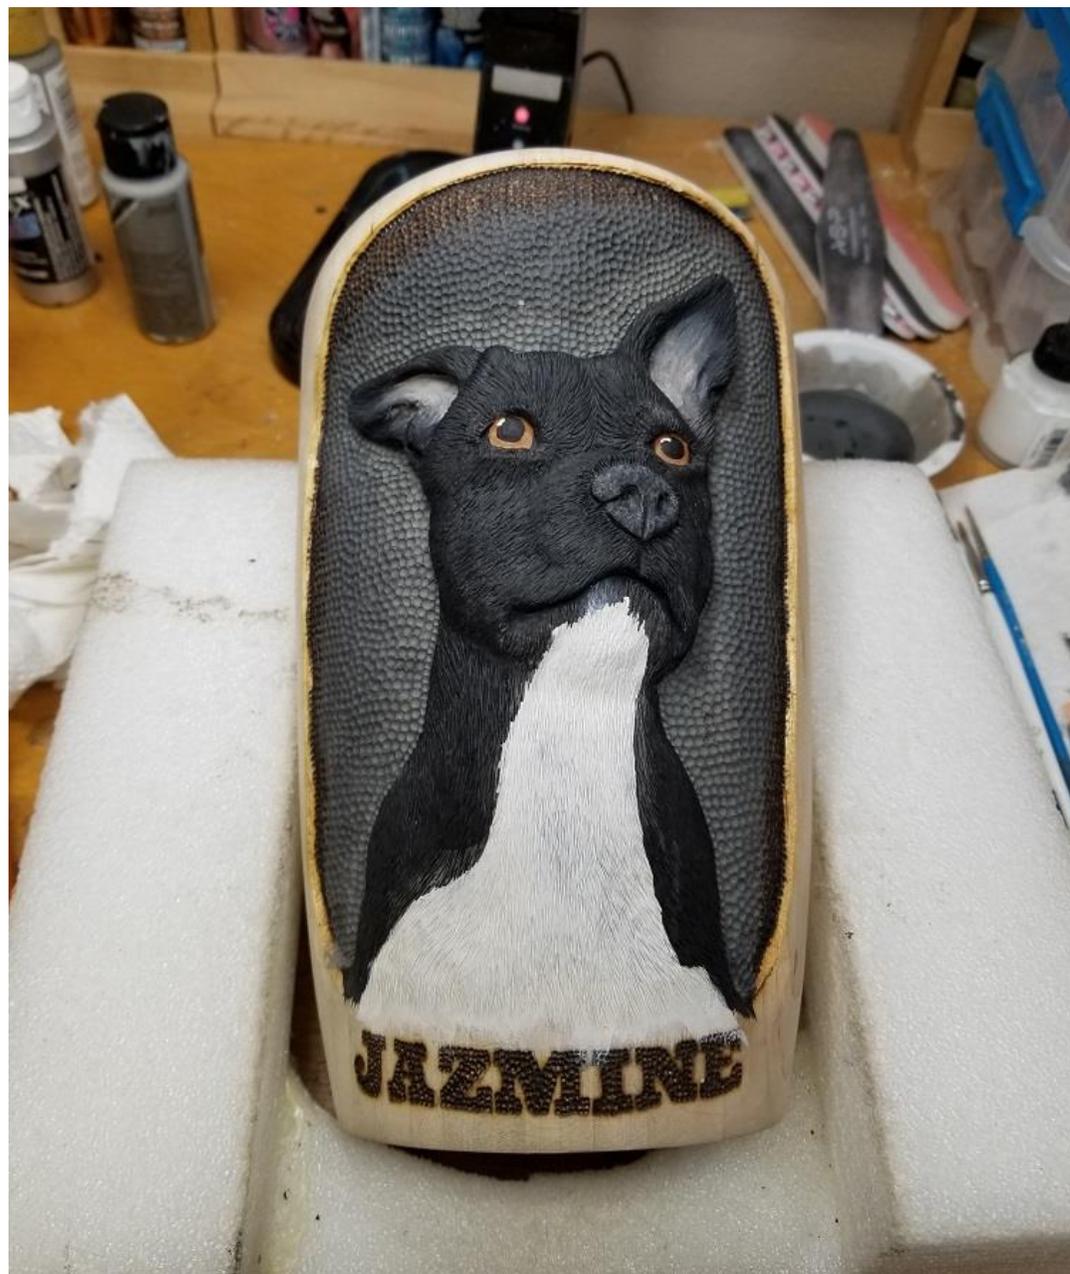

Ray Hamilton writes: A friend's farm got blasted with a highly forceful wind this (2021), summer, destroying buildings, buckling her camper and blowing down the old timber frame, mortise and tenon pegged barn. Essentially nothing left. I got this from the wreckage and fixed it up for a countertop memory. Hand chamfered edge, original draw knife created peg, labeled by original builder "center". She loves it. Inscribed at her request "barn again".

Ray Hamilton made this art table for his 12 y/o granddaughter.

It's made of walnut which he logged. He was looking for a table that tilted, and after seeing what was available, thought he could do better. It has adjustment of height front and rear, and a built in work shelf, transferable from side to side.

Stacy Nehl carved and painted this vase, honoring Jazmine, the dog.

Tom Mills turned this vase for his Brother-in-Law.

It was made from a manzanita branch that was recovered after a wildfire roared through his property in northern California. It shows that beauty can emerge from destruction.

Tom St. John made these two jewelry boxes from walnut, padauk, and wenge. One for his daughter, Randi and the other for his Daughter-in-Law, Sherry.

A close-up photograph of a woodturner's hands using a chisel to shape a piece of wood on a lathe. The lathe is spinning, creating a smooth, rounded surface on the wood. Wood shavings are being removed and are flying off the workpiece. The background is slightly blurred, showing the workshop environment.

**Merry Christmas**
